THE BOY PROBLEM.

Considered By Dr. E. O. Thayer at Laymen's League Meeting.

The annual meeting of the Laymen's ague of the Universalist church was held in the vestry last evening and after the business meeting an interesting talk was given by Dr. E. O. Thayer on the "Boy Problem." Dr. Don Grout of Waterbury was to have addressed the league, but was unable

Dr. Thayer said that the boy prob-lem was the foundation of the future social political and religious life of this country, and that the solution of the problem lies in the proper early training of the boys. He said that the boy problem was what we have made it. The boy himself is not naturally a problem. If everybody knew how to train their boys and the homes were all that they should be there would be

no boy problem.

To solve the problem, he said that parents should look after the proper physical development of the boys, Publie playgrounds should be established in the cities and these playgrounds should be under the municipal control and not the left to women's clubs to support.
